

REMARKS

Applicant respectfully traverses the Examiner's listing of four species. There are basically only two species, namely:

- I. Figures 1-7, 9 and 10 are essentially a single species by reason of a securement of the first and second connector members being by a single fastener.
- II. Figure 8 is a second species due to the first and second connector members being secured by a pair of fasteners.

The common feature to all species is the provision of a single pivot axis.

Applicant provisionally elects Species 2 as viewed in Figures 6-7. Claims 1-6 and 9 are readable onto the elected species. Contrary to the Examiner's assertion, Claims 1, 2, 4 and 5 are generic.

Respectfully submitted,

  
David G. Boutell
